

CORVA Truckhaven Challenge 1/22/2022

Those who participated and worked the Dirt Devil's checkpoint 4 were Tim Thomas, Bill Schopper and his family, Danny and Linda Ward, Rob Gabrielson and his son, Ron and Amy Weber, and Randy Smith. Ron and Amy along with Randy arrived Thursday. The rest of us arrived on Friday. We all had a blast at camp with good food, drinks, and company!

Unfortunately Vinnie, who put 6 months to devotion for a great event fell ill with the coronavirus and had to leave for his and all of everyone's well being. Please acknowledge and recognize Vinnie for everything he has done. Thanks to Vinnie and the crew of CORVA, the few thousands of people were able to come out to the Truckhaven desert for a great weekend. Although the day of the poker run was windy and cold, the enthusiasm continued. Tim, Ron, and Rob with his son were able to participate in the poker run. Before heading out, Rob had to do some repairs on a shock bracket and eventually just gave up on the weld repair until getting home. Through the trails, vehicles were reasonably spread out. Some check points had larger crowds with the games but all was good and fun!

The Dirt Devil checkpoint 4 seemed to have some quiet moments but a good flow of crowd and rigs to check out. The ladder ball game was an excellent addition to the check point as were all the rigs driving up the hill obstacle to get their next poker card. At the check point, we got to view all the vehicles. We determined there were definitely more side by sides than anything else. There were bikes, Jeep wranglers, Cherokees, Toyotas, Ford Trucks, Broncos, and....a Mini Cooper?

As we finished, we headed to camp where we could relax some more and enjoy some drinks and dinner. Some of us headed to the raffle. Although none of us were lucky, we got some free goodies that were tossed out to the crowd. The generator we donated was a great addition to the winner claim the prize. Afterwards we headed back to camp and enjoyed the rest of the evening. With some good beverages and bourbon, Ron and I have solved all the world's problems before turning in for the evening.
