

# The Dirt Devils Digest

A monthly publication of the Dirt Devils  
<http://www.dirtdevils.org/>

## Presidents Message:

The final run calendar will be voted on at the December meeting. If you have anything to add then December is the time to do it.

New Meeting spots reported by Rick

- Looking at Zito's. Please go by and visit. It can seat 100 people. It's about four and a half miles away from Marie Calendars. The address is 2036 N. Tustin Street, Orange, CA 92865.

[www.zitospizza.com](http://www.zitospizza.com)

- Black Bear Diner is another option in Buena Park

- Both places do not have any requirements. Need to have feedback at the next meeting in order to make a decision. Seem to be outgrowing the current meeting room and it's hard to hear.
- Sizzler has a room but not available on the first Tuesday. To change the date would require a change of the bylaws. Also the bylaws state that the club meets in Orange County.

- Zoe sent out a list of about 30 different places that she researched.

See you on the trail.

Ray Kleinhuisen

## Adopt a Trail

Hours 412

At the last run we worked the bypass, moved a few rocks, cut some brush back and picked up trash.

Motorcycles have created a single track by pass around the waterfall. Greg (ranger) has recommended that we look and build an easy by pass around the water fall.

Last weekend august 29<sup>th</sup> led 45 rigs around Big Bear back country. It was a lot of fun to see some of the closed down areas.

## Run reports

Adopta Trail Barbecue awards banquet about 100 people attended. The #1 club had over 3,000 hours. The Dirt Devils had about 400 hours. Mike noted that two Dirt Devils worked the adoptatrail booth at the Off Road Expo.

Rain in Death Valley

October storms caused large amounts of damage throughout Death Valley National Park. Flash floods destroyed significant multiple roads and heavily damaged several historic structures at Scotty's Castle

<https://www.facebook.com/DeathValleyNP/videos/1094230560601225/>

Dish Pan Trail, Pete and Josh went up and for a possible bypass but reported that it would not work. They were looking at an old road and the last couple hundred yards would require too much work.

Night run, Sugar pine mountain

12 vehicles, 7 of which were guest. No breakdowns great opportunity to test out our offroad lights. The place was light up like like a football stadium

### CA4 Wheel Drive Assoc

Reinstein wants to nationalize three parks.

South District Meeting. In this case it might be a good thing since is will keep the renewable energy guys out. January, 23, 2016 Ontario 9:00am Host club needed

Win a Jeep, keep trails open.

next to the 76 gas station

## November

12<sup>th</sup> – 14<sup>th</sup> Panamint Valley Days (PVD),  
Cal 4 Wheel event

Celebrating 30 years of having fun in the Panamints with all your friends and family; all those great sunrises and sunsets. All those flyovers, the rain, the snow, and the great starfield at night, really seeing the Milky Way. All this, makes Panamint Valley Days so fun and great to spend time with friends and family.

 Phone Number & email address)

## Day of the Run:

Hold brief driver's gathering before start of run. Include special instructions.

Assign vehicle order if there are vehicles with open diffs. Have vehicle with locked diff in front & behind. (If possible disperse vehicles with HAM radios near the front, middle and rear of the line.

Encourage drivers to learn the name of the person in front and behind his/her vehicle.

Assign Tail Gunner Vehicle

After returning home forward to the newsletter editor a Run Report and a few photos. subject line write "Run Report"

## DD Trail Ratings

Trail ratings are subjective and weather conditions over the years can change a trail. An easy trail can become more difficult after or during rain. The trail leader needs to be the final judge of trail conditions the day of the run. If any part of a trail is difficult the trail is rated difficult. If difficult sections have bypasses the trail may be suitable for less capable rigs or less experienced drivers.

E – Easy (Black Canyon, Mohave Trail)

M – Moderate (Devils Loop, Miller Jeep Trail)

D – Difficult (John Bull, Calico)

### I Easy trails could include these conditions:

- Any dirt, sand or gravel road.
- Gentle to mildly steeper hill climbs, mild rocky sections and/or soft sandy sections.
- Four wheel drive may not be necessary all the time.
- Pot holes or ruts that require high ground clearance.
- Water crossings are up to 15 inches deep.
- Suitable for full size vehicles.
- Low gears may be required on hill climbs.
- Recommend 4 wheel drive vehicle
- Suitable for most tire sizes

### (M) Moderate trails could include these conditions::

- Steep rutted and rocky hill climbs that require careful tire placement.
- Two to three foot ledges to climb and/or steep down hill drop offs.
- Rocky sections that can cause body or rim damage.
- Water crossings might have rocks and could be deeper than 12 inches.
- Brush or cactus may touch vehicle.
- These trails will require low range gears, high ground clearance and 4WD.

- Skid plates and body protection are recommended.
- Minimum 33 inch or bigger tires.
- Recommend at least one axle locker.

### (D) Difficult trails could include these conditions:

- Rocks as big as your tire to as big as your vehicle.
- Hill climbs are steep and may require extended wheel travel.
- These trails can have long sections of large rocks that require careful tire placement. .
- Three + foot ledges to climb and steep drop offs.
- Body damage is possible and brush may scratch vehicle.
- These trails will require vehicle modifications such as suspension lifts, body protection and skid plates.
- Minimum 35 inch or bigger tires.
- Recommend front and rear axle lockers.

## 10 reasons to be a trail leader:

10 – You pick the trail (hopefully someone will want to run it with you)

9 – You pick the run start time and meet spot

8 – You write the run announcement

7 – You pick the CB channel (duh 4)

6 – You conduct the drivers meeting (best if done before you start the trail)

5 – You carry the Dirt Devils club first aid kit (hopefully you know how to use it)

4 – You pick the bathroom stops (more stops keep you out trouble)

3 – You are the spotter when someone needs help (you'll get a lot of exercise)

2 – You will get unwavering support from all drivers even when you are hopelessly lost and confused.

1 – You get to ride in front of everyone out of the dust (this the only good reason to be a trail lead)

## Trail Tools

We all know it's important to carry tools in case something breaks when we are on the trail. We also know that spare parts can be the difference between walking and driving off the trail. The question is: will we be able to perform a trail fix that's not straight forward? These are important issues we all should think about before each run. The fact is, if you 4-wheel, on any level of difficulty trail, sooner or later you will be faced with a trail fix situation! Close scrutiny above and below your rig will reduce the likelihood. Loose screws, nuts and bolts.

But what tools and spare parts should we bring? Most of us have limited space for tools and spare parts in our rigs. Therefore we bring tools and spare parts that we hope will fix whatever breaks so that we can be back on the trail in minimal time. Knowledge of your vehicle is very

important when selecting tools and spare parts. It's a good idea, if possible to pack a separate tool kit specifically for your 4 wheeling vehicle. A good way to determine if you have the right tools in your kit is to do some basic maintenance on the vehicle using only tools from your take along tool kit. This will give you a good idea of how much you can accomplish with that tool kit and what items need to be added.

A sample list of items in a trail tool kit is identified below. Your knowledge of your vehicle should help you edit the list to include the tools and spare parts that could be needed on the trail. No matter how prepared you are, a failure can still ruin your day because it's not practical or possible to carry every spare part that might be needed.

Recommended trail tools:

1. Socket Set (some vehicles use both standard & metric), ratchet and extensions
2. Combination wrenches (some vehicles use both standard & metric)
3. Vise grips
4. Adjustable jaw pliers and channel locks
5. Crescent Wrench
6. Spark plug wrench
7. Screwdrivers (Standard & Philips )
8. Hammer 9. Bottle Jack
10. Utility Knife
11. Hacksaw
12. Latex Gloves
13. Tire plug kit
14. Hacksaw
15. Rags
16. Funnel
17. Flashlight / work light (extra batteries)
18. Ratchet straps
19. Cordless tools (impact driver, saw, etc.)

Spare parts and consumables:

The extreme situations: carry no spare parts, or carry so many your rig breaks due to the extra weight. What you need to do is get somewhere in the middle by carrying parts that are most likely to fix your broken rig. If you have knowledge of your vehicle, any special items can be added. If your rig has a history of U joint issues carry a spare.

Sample Spare parts list: add or subtract as needed!

1. Fuses, electrical wire, electrical tape, duct tape, nylon wire ties, silicon sealer
2. Miscellaneous nuts, bolts and hardware
3. Fan belts, hose, clamps
4. Valve stems, tire plugs
5. Engine oil, brake fluid, transmission fluid, etc.
6. Coolant or water for the radiator

Once you have everything together, you need to determine how to store them in your vehicle. A permanently installed tool box or a carry-on tool bag / box that can be secured to the vehicle are good choices.

A breakdown will likely include crawling under the vehicle and messy parts. Bring a blanket, towel or plastic trash bag that you can lay on. They also help keep parts and tools away from the dirt.

Many breakdowns can be fixed on the trail with some tools, spare parts and knowledge of the vehicle. Keep an open mind when the fix is not straight forward. Many vehicles have been driven off the trail with unique fixes. A ratchet strap can be used to keep an axle in place to drive off the trail. (I have personal experience) A high lift jack handle and hose clamps can straighten and splint a bent tie rod.

With some forethought and preparation you should be able to deal with a wide range of common trail fixes. The big plan here is to safely get you off the trail after a breakdown.

**Cowbells**

**The cow bell rules are:** If you get stuck and are unable to move under your own power and need the help of a winch or you get strapped from one of your fellow jeepers then you have earned the privilege of hanging a cow bell from your front bumper. You must leave the cow bell on the front of your rig until another Dirt Devil gets stuck then, you can proudly hand it over. This starts at the beginning and the end of the trail, not on the highway.
